Advanced Features

WISERTrade offers great **flexibility** in searching and sorting the database. Also, all your search criteria are entered on a single page and the data comes back on the same page! If you want to change any criteria, you make changes on the same page. You don't have to submit page after page of input and then page back as many times to change something.

WISERTrade can **graph** or **map** the data to provide a quick snapshot of long-term and/or recent trends. All graphs and maps are downloadable so they can be easily inserted in your documents. You can create **customized lists** of countries, industries, commodities, states, or ports to accommodate your specific research needs.

Technical Support

Complementing its extensive data and features, **WISERTrade** offers **outstanding technical support** for both the data and software. The WISER Trade Team has worked with State and US trade statistics since 1987 and is happy to share its expertise. Technical support is available by phone or email.

Library and University Access

WISERTrade provides **access by range of IP addresses** for libraries and universities. WISER's trade database is an essential tool for students, faculty, business schools, and research institutes.
